Youth in the Caribbean

- Over 60% of the Caribbean population under 30
- School completion rates 20% higher in Caribbean compared to LAC region, yet few complete tertiary programmes
- Highest rates of HIV/AIDS after Africa
- One of the highest levels of violence worldwide, directly impacting youth
- High rates of unattached youth (no work, no study) and youth unemployment (nearly three times the rate of adult unemployment)
- Even those students who have gone through skills training are not always well prepared to enter the work force

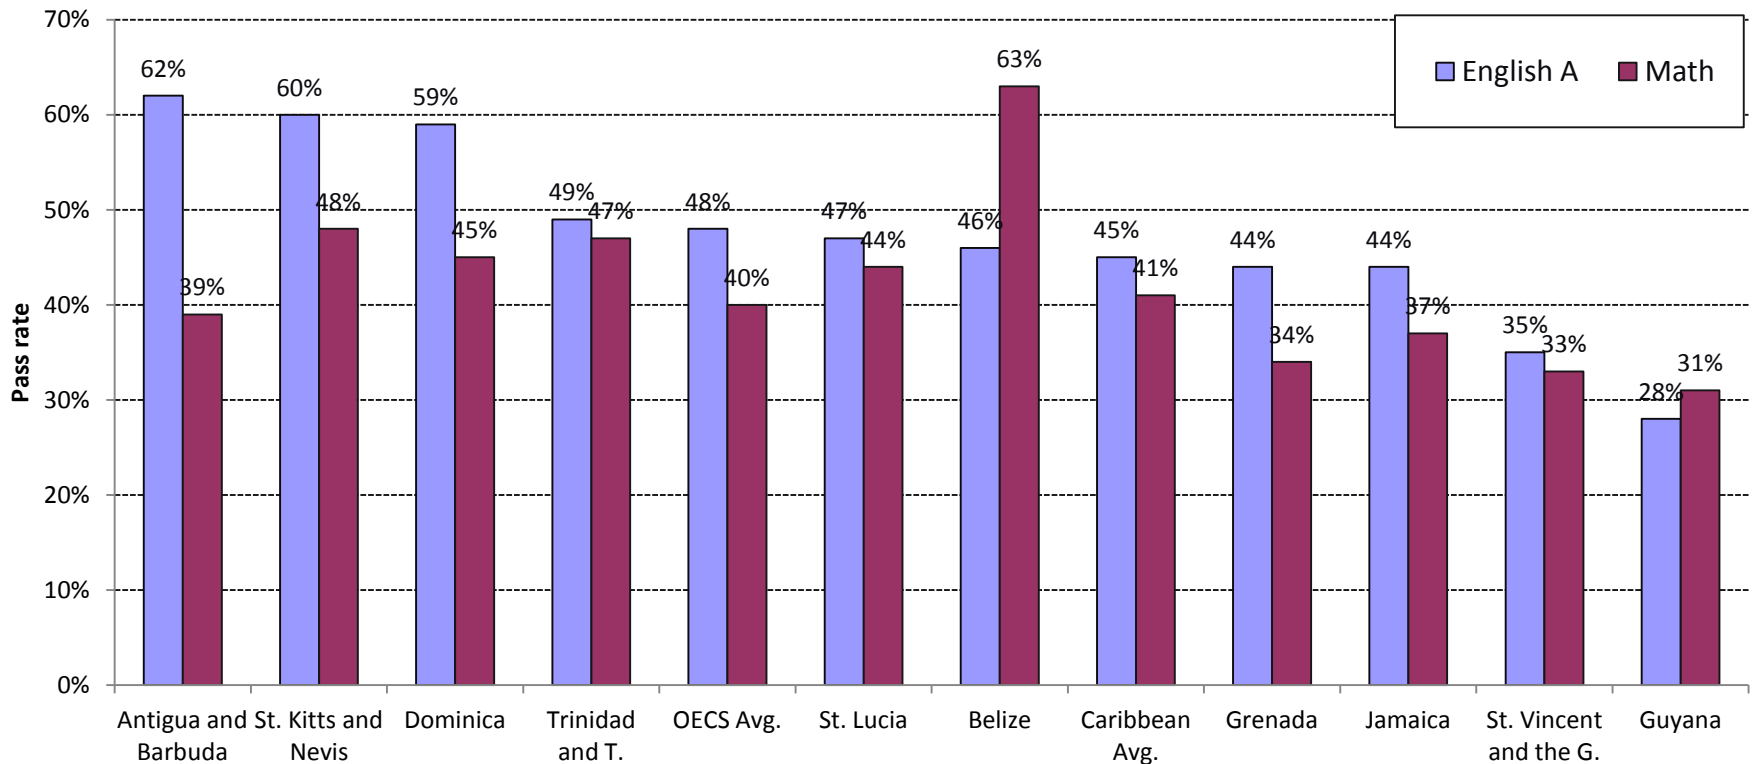

New service jobs demand skilled workers

How to Empower Young People

- Socio-emotional and 21st century skills are as important as cognitive/academic skills
- Informal networks are important in the job search
- Internships are important to connect youth to the labour market, and mentors are important to help at-risk youth sustain employment
- Changing skills required by the labour market demand adaptability to different kinds of jobs and life long learning opportunities
